

~~25 April 1973~~

~~MEMORANDUM FOR THE RECORD~~

SUBJECT: ~~Possible Reorganization of PTOS~~

1. The attached chart depicts an organizational structure of PTOS which includes ~~25X9~~ staff slots and ~~25X9~~ contract positions. The chart does not reflect the contract positions currently authorized under the ~~25X1A~~ program.
2. It is proposed that the Overseas Support Division be abolished and its functions transferred to the Physical Security Division, except its responsibilities dealing with alarms and physical security equipment. The latter responsibility ~~be~~ should be transferred to the Technical Division. The Physical Security Technology Branch presently in Physical Security Division ~~be~~ should be transferred along with the personnel involved to the Technical Division. The transfer of the technical functions from OSSD and Physical Security Division represent a total of ~~25X9~~ staff positions including one secretary. This realignⁿment will consolidate all the engineering capabilities, except for the specialized safety functions, in the Technical Division. It is believed that this skills realignment ~~will~~ will have a salutary effect on production and morale. The

possibilities of professional growth within Technical Division is substantially increased among technically skilled personnel

3. The Information Handling Security Branch currently in Physical Security Division ~~should~~ be eliminated from Physical Security Division along with the Deputy Chief, Physical Security Division for Computer Security. This function along with slots and personnel ~~should~~ be reestablished as an Information Handling Group reporting directly to the DD/PTOS. The Top Secret Control function assigned to the Office of Security by the Executive Director ~~Comptroller~~ ~~should~~ be staffed with a GS-14 and GS-07 Intelligence Clerk assigned to the Information Handling Security Group. The realignment of this organization reduces one layer of command and permits direct supervision by the DD/PTOS.

4. As noted in the chart, the current ADD/PTOS has been removed from the Office of the DD/PTOS and reassigned as Chief, Operations, PTOS.

5. The reorganization results in a more functional relationship more direct lines of authority and greater flexibility within divisions. It is believed that this structure will permit the directorates to increase its production without ^{a corresponding} increase in manpower and funds.
